Project Status report

Name: Julian Gonzales

Community (UN SD goal): SDG 10: Reduced Inequalities, SDG 11: Sustainable cities and communities

MVP # 1

Sprint cycle dates: Oct 17 - Oct 31

Project Name	ClubSleuth
Blurb	ClubSleuth is a web app that is aiming to help people find the right community for them in the form of local clubs. With this web app I am aiming to hit SDG 10: reduced inequalities, and SDG 11: sustainable cities and communities. ClubSleuth is all about bridging local clubs and people together by letting them search in this web app their specific interests in clubs. You would be able to put in where you live and registered clubs in that place would then show up.
For Week Ending	Date of the report-out/presentation/demo
Project Status	Green
Status Description	The status is green because what was planned for MVP 1 was mostly done. Specifically the searching with provided address (province and city) and information showing of each club.

Activities—During the past sprint cycle

List all activities that the team members worked on during the past week of the project. Show code and/or demo what you got
- Backend developed
- Database initialization
- Search api
- Redux store to work
- RTK Query
- Frontend work

Project Issues

List any issues from the Issue Log that are significant and should be shared with the audience of this report. If any related work has been done or decisions have been made, a summary should be provided.
- Google Places API:
    - Google places api can cost money if used widely, because this is a public repository I chose not to use it in my project in order to avoid a leak

- MongoDB Database:
    - In order to avoid database leak, backend work is done in a private repository

Project Changes

List any project changes that were approved since the last report/discussion.
- No project changes were discussed/reported

Activities—Planned for Next Week

List all activities that the team members will work on during the next week of the project.
- Frontend to work with mobile
- Login and signup to work
- User able to add/edit current clubs

Reflection

Do you feel "on track"?
- Yes, I feel on track, what I had planned for MVP 1 is mostly done, only needs some refining

What progress do you particularly feel good (great) about?
- I don't particularly feel good about one thing, I think overall I've done a pretty good job about everything and I am proud if what I have accomplished for this scrum

What barriers (if any) do you feel is/are a current impediment to success?
- I think the google places API requiring money for wide use is a pretty big barrier. I say this because if I had that API making this global would be a much easier thing.

What help (if any) do you require to move positively forward?
- I need more feedback on club owners to see if I am missing anything they would want to put in here to make it easier for customers or people to search for clubs or see which club is best for them

What questions or concerns do you have (if any)?
